TO BE A COMPLETE SOLUTION PROVIDER FOR SECURITY SYSTEMS AND PROTECTION SYSTEMS AND TO SATISFY OUR CLIENTS BY OFFERING THEM ULTIMATE SAFETY IN TOTALITY. TO OFFER BEST AFTER SALES MAINTENANCE SERVICES TO ALL OUR VALUED CUSTOMERS IN THE FORM OF ANNUAL MAINTENANCE CONTRACTS

OUR BUSINESS ACTIVITIES

WORDS ABOUT SERVICES..

PRODUCTS FIRE DETECTION SYSTEMS

A fire detection system (FDS) is an alarm system that receives data on, assesses and then responds to events reported by various fire detectors. Fire detection systems are permanently installed manual and automatic systems to detect fires at an early stage, warn those affected and quickly inform the relevant emergency service.

Conventional & Addressable Intelligent Fire Alarm Panels Workstations, Addressable Ionization Smoke Detectors, Optical Smoke Detectors, Optical Beam Detectors, Heat Detectors, Multi-Sensor Detectors, Flame Detectors, Video, LPG Gas Detectors, H2S Detectors, Manual Call Points, Alarm Bells, Sounders, Water Leak Detection System, and all forms of passive fire protection.

FIRE SUPPRESSION SYSTEM

Have you asked yourself what is fire suppression? According to a Wikipedia article on fire suppression systems, they are defined as devices that control and extinguish fires automatically without the need for humans. According to research conducted by the Fire Equipment Manufacturer's Association, 93% of deaths from fires is due to fires that have advanced past the early stages. Therefore, an automatic fire suppression system is essential as it stops fires in their early stages which will minimize loss of life. Fire suppression systems have a wide range of applications including use as part of server room fire suppression, data center fire suppression and many more.

Gaseous Fire Suppression Systems (FM200, NAF 227ea, NAF S125, Inergen, Novec, Argonite, Argon, Aerosol). Foam Based Fire Suppression System, Deluge Systems) Wet Chemical Kitchen hood Systems. Dry Mist Suppression system. Tube Technology Suppression System

WORDS ABOUT SERVICES..

FIRE EXTINGUISHERS

A fire extinguisher is an active fire protection device used to extinguish or control small fires, often in emergency situations. It is not intended for use on an out-of-control fire, such as one which has reached the ceiling, endangers the user, or otherwise requires the expertise of a fire brigade.

Ozone Friendly Clean Agent Fire Extinguishers, ISI and KITE Marked ABC Dry Chemical Powder Fire Extinguisher, Carbon Dioxide Extinguishers, Water Type Fire Extinguishers, Wet Chemical Fire Extinguishers, Mechanical Foam, Water Mist, AFFF Foam Fire Extinguishers

STRUCTURED CABLING SOLUTION

Pearls Brightness Integrated is a leading provider of structured cabling solutions and is recognized as one of the largest cabling providers in Oman with the highest level of accreditation with Belden. We have over 20 years of experience in the design and installation of structured cabling systems that are tailored to meet mission-critical environments, enabling today's needs to be met and future requirements to be implemented without additional costs.

We provide our clients with a complete full-service wrap submitting expert consulting infrastructure solutions, installations, delivery and support services, which increase efficiency, protect business assets and minimize risks

OUR BUSINESS ACTIVITIES

WORDS ABOUT SERVICES..

Pearls Brightness Integrated design, supply, install and maintain professional Public Address (PA) sound systems, Intercom system and emergency voice alarm systems with intelligible Voice communication systems for retail outlets, shopping centres, venues, including stadiums, theatres, exhibition halls and for infrastructure in the government / public sector.

From robust high-intelligibility commercial PA (public address) and intercom solutions to sophisticated Professional entertainment sound systems, Pearls Brightness Integrated audio system engineers work with retail, IT and education stakeholders to create PA sound solutions that add value and perfectly suit your organizational and commercial needs.

CCTV IP & CONVENTIONAL CAMERAS AND ACCESSORIES

Cameras on a modern analog CCTV system send their video in the traditional base band format over coax or UTP cabling back to a digital video recorder (DVR). Here, video is digitized and stored on hard drives. Most modern DVRs are a network device, and as such can be accessed remotely from the LAN, or with the proper configuration, from across a WAN or the internet. There are no tapes to change. Video is kept on hard drives, typically on a FIFO basis so there is always a rolling video archive of the past X days.

IP video cameras broadcast their video as a digital stream over an IP network. Like an analog system, video is recorded on hard drives, but since the video is an IP stream straight from the camera, there is more flexibility as to how and where that video is recorded. The DVR is replaced with an NVR (network video recorder), which in some cases is just software since it doesn't need to convert analog to digital. Video footage can then be stored on new or existing network RAID drives as directed by the NVR software.

OUR BUSINESS ACTIVITIES

WORDS ABOUT SERVICES..

ACCESS CONTROL

• Face, Biometric, Card, Code Readers. • Biometric Sensor with fastest matching speed • Award winning FINGERPRINT Algorithm • Support EM, HID, MIFARE, DESFIRE, i Clas Cards • Work like stand alone and network system • From 2000 to 50,000 user capacity • Built in memory to store upto 1 million logs • Stable and reliable hardware • Multiple reader to suit any requirements. • Easy integration with Fire Alarm, CCTV, Lift, and BMS System

VIDEO INTERCOM IP & ANALOGUE VIDEO DOOR PHONE FOR VILLAS AND APARTMENTS

VIDEO INTERCOM SYSTEM • From single monitor villa system to 2000 monitors apartment system. • Support multiple entrance and up to 4 monitors for villas. • 2 wire system for existing villas and flats. • Intergration with CCTV and Access Control. • Slim and elegant design. • Support 2 way reception / Guard Unit

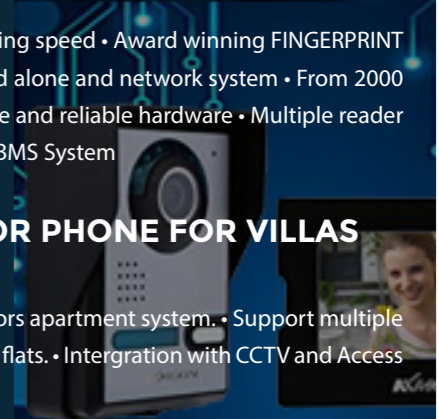

BUILDING SATELLITE TV SYSTEM

SMATV

SMATV (Satellite Master Antenna TV) is based on the principle of distribution of terrestrial, satellite, analogue and/or digital signals that are received and distributed to multiple television endpoints.

As residential and office building grow in size, an increasing number of subscribers require to have different channel requests. SMATV systems save the need of individual antennas to be installed for each tenant.

we provide SMATV solutions that provide customers with high quality television signals, backed by outstanding customer service. We have installed SMATV projects for various buildings, covering millions of television around last 27 years.

OUR CLIENTS

We are proud to work with a fantastic set of clients. Our approach is different to traditional research agencies. We recognise that it isn't always easy to sell in "different". We work with clients who are prepared to embrace change because they believe it is the only way to deliver the foresight needed for business growth.

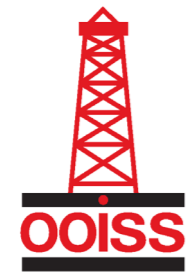

We focus on long-term relationships with clients, co-creating research solutions that deliver to their emerging business needs. We work with clients who are interested in developing positive business partnerships and we always look for points of cultural alignment. We're proud to have built Pearls Brightness Integrated on recommendation and enduring relationships with clients who have moved to new companies.

OUR PARTNERS

Some people wonder why Pearls Brightness Integrated buys most of its materials from just a few of the very best companies. It's true: most of our suppliers are the largest in the business. And most of them would say that we are their largest client. This gives us a powerful buying advantage. And that's an advantage to you.

With relationships that go back for years as our suppliers' most important client, we can often obtain materials when other contractors are idled by a shortage. This ready availability allows us to finish your job faster. Our bulk buys also command the best prices — savings that allow you to redirect a part of your budget to other areas!
